Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Specification

The disclosure is objected to because of the following informality:

Page 4, line 20, reference is made to "body portion 26"; however item 26 is not identified in any of the figures.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 17-19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 17 recites the limitation "said at least one handle" in line 1. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sweatt '391 in view of Marceca '279.

Sweatt discloses an apparatus for removing a cork from inside a mouth of a bottle, the apparatus comprising: at least one member for engaging the outside of the mouth of the bottle, at least one handle connected to the at least one member, and a shaft operatively coupled with the at least one handle so that movement of the at least one handle member rotates the shaft; the bottle has an oversized mouth and the cork is correspondingly sized, the at least one member being adapted to mate with the oversized mouth of the bottle; at least one member comprises a lever pivotally attached to the at least one handle; the shaft is pivotally attached to the at least one handle; and a frame and a support member connected by an axially extending rod, the support member being movable relative to the frame, the shaft being mounted to and projecting from the support member; the frame and the support member connected by an axially extending rod, the support member being movable to the frame, the shaft being mounted to and projecting from the support member. Sweatt does not specifically disclose a shaft having at least two helical spikes projecting therefrom. Marceca discloses a corkscrew wherein the shaft has two helical spikes projecting therefrom so as to dissipate the force exerted on the cork while it is being extracted. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have made the corkscrew of Sweatt to have two helical spikes projecting from an end portion of the shaft as taught by Marceca so as to dissipate the force exerted on the cork while it is being extracted.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alvin J Grant whose telephone number is (703) 305-3315. The examiner can normally be reached on Mon-Fri 8:00-4:30.
